PROFESSIONAL SUMMARY

Results-driven **Full-Stack Software Engineer & Generative AI Developer** with proven end-to-end project ownership across international enterprise systems (**Sweden**) and cutting-edge Generative AI applications. Extensive hands-on experience modernizing legacy ERP frontends using **OWL (Odoo Web Library)**, integrating **European e-CMR digital freight standards**, architecting enterprise **Java (PPE tracking)** platforms, and engineering full UI/UX systems for **LangChain/AstraDB RAG AI Chatbots**. Skilled in **Python, Django REST Framework, React 19, Java**, and modern AI automation workflows (**n8n, Cursor AI, Antigravity**).

TECHNICAL SKILLS

Languages:	Python 3, Java, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
Frontend & ERP UI:	React 19, React 18, OWL (Odoo Web Library), Vite, Tailwind CSS v4, Bootstrap 5, Three.js, GSAP
Backend & ERP:	Django REST Framework (DRF), Java, Odoo ERP, Node.js, Express.js, SimpleJWT, RESTful APIs
AI & Automation:	LangChain, AstraDB (Vector DB), OpenAI GPT-4, RAG Architectures, n8n (AI Agent Workflows)
Specialized Protocols:	European e-CMR Digital Freight System, PayPal Sandbox SDK, In-Browser Compiler Engine
Databases & Cloud:	PostgreSQL, SQLite3, Supabase, Vercel, Docker, Git, GitHub
AI Dev Tools:	Cursor AI, Google Antigravity, GitHub Copilot, Claude AI, Postman, VS Code

PROFESSIONAL EXPERIENCE

Odoo Developer & Frontend UI Lead • edit solution	May 2026 – Present Sweden (Hybrid)
- Owned and led the end-to-end development of an enterprise Transport Management System (TMS) for international logistics operations in Sweden. - Completely re-architected the frontend by replacing default Odoo templates with a custom, high-performance user interface built with OWL (Odoo Web Library). - Integrated the European e-CMR (electronic Consignment Note) digital freight protocol, enabling paperless cross-border transit tracking and automated transport documentation. - Engineered custom PostgreSQL data models, automated dispatch workflows, and dynamic QWeb reporting templates for freight billing and driver manifests.	
Java Software Engineer • edit solution	Sep 2025 – May 2026 Sweden (Hybrid)
- Managed the end-to-end delivery of an enterprise Personal Protective Equipment (PPE) compliance, allocation, and tracking platform for Swedish client operations. - Developed secure Java RESTful APIs for real-time safety equipment inventory tracking, inspection audits, and employee allocation telemetry. - Optimized complex SQL queries and relational schemas, significantly reducing latency for high-concurrency safety compliance reports. - Collaborated directly with international stakeholders in Sweden adhering to Agile/Scrum delivery milestones.	

AI Developer & Full-Stack Engineer • Iqra Technology

Jan 2025 – Present | Maharashtra, India

- Promoted to full-time engineer building scalable Generative AI systems, Python backend services, and interactive React frontends.
- **Enterprise AI Chatbot & DMS:** Architected and engineered the **entire frontend UI/UX system** from the ground up, seamlessly integrating with LangChain, AstraDB Vector Database, and OpenAI GPT-4 with a multi-format RAG pipeline.
- **AI Training Assistant & Smart Compiler:** Served as lead developer testing the in-browser compiler engine, isolating edge-case execution bugs across multi-language compilers (Python, JavaScript, Java), and ensuring runtime stability.
- **Enterprise Web Portals:** Built full-stack corporate solutions including **TravEx** (Travel & Expense Management Portal) and **Employee Leave Management System (LMS)** with React 19, Tailwind CSS, and RESTful APIs.
- Built automated AI agent workflows using **n8n** for event orchestration and background data pipelines.

Software Engineering Intern • Iqra Technology

Apr 2024 – Jan 2025 | Maharashtra, India

- Engineered **Shoppit** (Full-Stack E-Commerce Platform) in April 2024 featuring a decoupled React frontend, Django REST Framework backend, and PayPal Sandbox payments.
- Developed modular frontend UI components and integrated client-server REST APIs.

SEO Developer & Technical Analyst (Intern) • Iqra Technology

Oct 2023 – Jan 2024 (4 mos) | Maharashtra, India

- Performed on-page technical SEO audits, core web vitals speed optimization, and structured metadata schema markup.

FEATURED PROJECTS

Enterprise AI Chatbot & Document Management System (DMS)

Tech: LangChain, AstraDB (Vector DB), OpenAI GPT-4, React 18, Django REST Framework, Vite

- Engineered full UI/UX system for conversational enterprise RAG application with document ingestion (PDF, DOCX, XLSX, Web URLs).
- Integrated AstraDB vector search and sandboxed pandas execution for real-time spreadsheet analytics.

AI Training Assistant & In-Browser Smart Compiler

Tech: React 18, In-Browser IDE, Multi-Language Compiler, Tailwind CSS, OpenAI GPT

- Interactive browser code IDE supporting multi-language syntax highlighting, automated test case evaluation, and execution timing benchmarks.
- Tested and debugged core execution engines; integrated AI assistant for real-time debugging tips.
